Bergman, A.
Remote control of hydro-electric power-stations 113

Bernander, G.
Physical aspects of the Ågesta reactor 101

Björklund, B.
New construction principle for electric locomotives 9
Dampers for railway vehicles 29

Bülow, N.
Viksjöfors – an unusual hydro-electric power-station 23

Bååth, S.
The ASEA Multi distribution system 49

Ericsson, S.
Some components manufactured by ASEA for the Ågesta reactor 70

Funke, B.
Multi-anode mercury-arc valves for voltages up to 1650 V 147

von Geijer, G.
Remote control of hydro-electric power-stations 113

Halle, L.
The manufacture of reactor fuel and fuel assemblies 96

Hammarlund, P. E.
Induction stirring for the vacuum treatment of steel 187

Hansson, H.
Remote control of hydro-electric power-stations 113

Hjertberg, P.
Control equipment for the Ågesta reactor 88

Hollander, S.-G.
Electrical equipment for slab shears 178

Håkansson, G.
Multi-anode mercury-arc valves for voltages up to 1650 V 147
Electrical equipment for slab shears 178

Johansen, L.
South America's most modern newsprint machine driven by ASEA equipment 127

Johansson, S.-E.
Automatic programme control installations for stage lighting 44

Johnsson, S.
Winding technique makes possible very light hydraulic presses and high-pressure chambers

Kain, P.
Control of strip tension in cold strip rolling mills

Larsson, B.
Remote control of hydro-electric power-stations

Leine, L.
The Ågesta reactor

Lindberg, P.
Two new Products Divisions

Lindén, G.
Viksjöfors – an unusual hydro-electric power-station

Lindström, O.
Fuel cells

Ling, E.
Flow indicators

Molin, Å.
The Ågesta reactor

Norling, N.
E.O.T. cranes for the handling of pulpwood

Nylander, P.-I.
Thermal equipment

Reibring, G.
Thyristor static converters in rolling mills

Samuelsson, P.
Induction stirring for the vacuum treatment of steel

Schmiterlöw, F.
Dampers for railway vehicles

Skogby, P.
Capacitor dischargers, a switching problem

Strömberg, A.
Control of strip tension in cold strip rolling mills

Svedebrand, R.
Electronic weighing in industrial environments

Vitols, G.
132 kV outdoor switchyard for the Aswan Dam, Egypt

LIST OF CONTENTS

Page

esearch and testing

uel cells 3
Vinding technique makes possible very light hydraulic presses and high-pressure chambers 107
onneville Power Administration's extra-high-voltage direct-current test centre* 122

uclear power

SEA and nuclear power 63
he Ågesta reactor 64
ome components manufactured by ASEA for the Ågesta reactor 70
hermal equipment 77
ontrol equipment for the Ågesta reactor 88
he manufacture of reactor fuel and fuel assemblies 96
hysical aspects of the Ågesta reactor 101
ransport from Sweden to the U.S.A. of irradiated reactor fuel* 104

urbines

ew main propulsion turbine for 10 000–30 000 SHP* 34
as-turbine power-station in Venezuela* 36
lectro-hydraulic governors for steam turbines* 121
ower Pac – a new approach to the generation of electric power* 182

lectric machines

.C. motors for continuous strip-rolling mill* 34
ynchronous generator for connection to diesel engine* 39
SEA in the Snowy Mountains* 123
rake motor* 141
eat exchangers for electric motors* 161
new millionaire* 204

atic converters

hyristor converter for sugar centrifugals* 35
tatic inverter with thyristors* 140
Iulti-anode mercury-arc valves for voltages up to 1650 V 147
ectrical equipment for slab shears 178
ompact outdoor rectifier equipment* 184
hyristor static converters in rolling mills 195

apacitors

apacitor dischargers, a switching problem 15
remarkable delivery* 142

lectrical apparatus and switchgear

ime-lag under-voltage relay typ RODA* 19
hrow-over relay type RRMVB 2* 19
ignal lamp for direct-on-line starters* 33
Veb-break indicator for printing presses* 33
ignal contact on relay type RVO* 35
Ieasuring pile force with pressductors* 37
npulse tester TUA 5, a new instrument for locating faults and checking the insulation in low-voltage installations* 38
ew data for reaction circuit-breakers* 40
utomatic programme control installations for stage lighting 44
he ASEA Multi distribution system 49
ew auxiliary relay type RMH* 56
ressductor weighing equipment in a ladle crane* 57

Page

Control board in the control centre of AB Täby Elverk* 58
Control board in the control centre of AB Lidingö Elverk* 59
New photo-electric impulse transmitter* 60
Remote control of hydro-electric power-stations 113
Standard motor starters with semi-conductors* 117
Pressductor truck scales* 119
Set of control equipment for test circuits, instruction and demonstrations* 120
Electro-hydraulic governors for steam turbines 121
Control of strip tension in cold strip rolling mills 133
New housing for direct-on-line starters type DAMD 6* 140
Time-lag relay type RRKH* 141
Signalling device type RRSH* 142
Indoor isolators and fuse-switches* 160
Low-voltage switchgear type VMB* 161
New circuit modules for digital equipment* 162
Electronic weighing in industrial environments 167
Flow indicators 193

Traction and marine equipment

New construction principle for electric locomotives 9
Dampers for railway vehicles 29
New main propulsion turbine for 10 000–30 000 SHP* 34
A new millionaire* 204

Cranes, hoists and materials-handling equipment

Semi-portal bridge crane for handling ingots* 18
Pressductor weighing equipment in a ladle crane* 57
Soaking-pit cranes* 118
Pressductor truck scales* 119
Scrap-handling crane* 139
Open-hearth furnace charging crane* 163
Stacker crane for 3 tons* 164
Electronic weighing in industrial environments 167
Top-supported jib crane* 183
E.O.T. cranes for the handling of pulpwood 199
Gantry crane* 203

Electric furnaces

Induction heating equipment for forging billets* 60
New induction stirrer* 120
Large mains-frequency coreless furnace exhibited in the U.S.A.* 142
Induction stirring for the vacuum treatment of steel 187

Electric power plants and networks

Viksjöfors – an unusual hydro-electric power-station 23
Gas-turbine power-station in Venezuela* 36
Automatic programme control installations for stage lighting 44
Remote control of hydro-electric power-stations 113
Bonneville Power Administration's extra-high-voltage direct-current test centre* 122
ASEA in the Snowy Mountains* 123
132 kV outdoor switchyard for the Aswan Dam, Egypt 154
Power Pac – a new approach to the generation of electric power* 182

Industrial equipment

Thyristor converter for sugar centrifugals* 35
Winding technique makes possible very light hydraulic presses and high-pressure chambers 107

* Published under the heading "News in brief".

	Page
Raw-sugar centrifugals*	124
South America's most modern newsprint machine driven by ASEA equipment	127
Control of strip tension in cold strip rolling mills	133
Electrical equipment for slab shears	178
Thyristor static converters in rolling mills	195
Organisation and staff, exhibitions, etc.	
New ASEA subsidiary in London*	20
J. Sigfrid Edström	43
New ASEA brochures	
New appointments*	
Large mains-frequency coreless furnace exhibited in the U.S.A.*	
Electrical Engineers Exhibition, London, 1964*	
New ASEA brochures	
Two new Products Divisions	
New ASEA brochures	
Ivar Herlitz leaves ASEA*
